Warranty*	LIFETIME

The Datum NA532 Automatic Level is a high quality instrument, robust and built for site use, it's cast metal casing is packed with features normally found on much more expensive products.

With 32X Magnification and an accuracy rating of ±1mm per double km run this high accuracy model will serve for most levelling applications. A built in 360° Horizontal Circle helps you turn out angles while its built in compensator check button assures you all is well with the system when checks are required.

High quality optics display crisp images making staff reading clear and simple, there is even a built in handle to make carrying and mounting to Tripods quick and safe. Register your product at datumproducts.com and have it regularly serviced by a Datum service centre and you qualify for a LIFETIME warranty covering manufacturer defects too.
